Intersteam 2021

## EQUIPMENT SOLUTIONS

- Plus+ Water Treatment and Infection Control System supplied in ALL Models
- Blue Evolution Steam and Vacuum with UV-C
- SteamKing Plus+ Systems—Classic, Atomic, Pro and Max
- Blue REVO Commercial Steam and Vacuum
- Magic Vapor Plus+
- The Steamer
- HydroTek Full Line Pressure Washers
- Alkota Steam and Hot Water Systems
- Sioux Steam Flo Generators and Heaters
- Walters Steam Gun Systems
- Residential Equipment

## Steam System Experts Since 1997

There is an ideal steam cleaner for every application and budget.

We can help you choose the best steam cleaner for you.

Using the right steam cleaner for your application makes cleaning, disinfecting, degreasing, restoring and renewing jobs safe, easy, fast and successful. High heat, low moisture steam vapour systems are the proven best way to clean and sanitize. The wide selection of systems available from Intersteam ensure that you have the right tool for any job.

We specialize in innovation—from the first steam system used daily in Canada in 1997 to the introduction of the Plus+ Water Treatment and Infection control System and UV-C Blue Evolution Vacuum systems. We work with suppliers throughout the world to offer you the highest quality, most durable, safety standard compliant and best performing equipment available.

Our experience with our customers over the past 2 decades guarantees that we are able to offer you proven cleaning equipment with tried and tested cleaning guidelines. Our steam team has a combined total of over 40 years of experience—and we are experts. We only supply steam-based systems, and that is what we know and understand.

## If it makes steam—we have it!

Your single source for steam and hot water based systems

### Industry Leading Solutions—for every Industry!

We offer steam based systems in every configuration you could ever need. 120, 220-240, 575V, Propane, Diesel, Natural Gas and Dry and Saturated Steam Options are all available. We are able to work with you to offer the ideal system for your use and budget.

We specialize in hospitality, healthcare, concrete, municipal, educational, institutional, agricultural, manufacturing, processing and facilities maintenance.

- Reduce or Eliminate your use of chemicals.
- Improve your staff support of your cleaning programs.
- Get better results—with less work.
- Increase compliance with industry and facility standards.
- Make cleaning an enjoyable and respected process.

## Dry Steam Systems

Typically used in residential, commercial and industrial cleaning for detail, deep and recovery cleaning applications. Effortlessly restore grout, deep clean washrooms, kill bed bugs and their eggs, disinfect wheelchairs and mobility aides, prep surfaces for coatings and paints, clean equipment in production and maintenance facilities, remove grease and stains from surfaces and leave no detergent residue behind. The high heat and low moisture of a dry steam system allows for a complete clean of most surfaces without using a lot of water or any detergent soaps or chemicals. All Systems Now Supplied with Plus+ Water Treatment and Infection control Technology.

## Saturated Steam Systems

As your temperature rises, you need less pressure to get amazing cleaning results. A saturated steamer performs similar to a pressure washer, but with much higher temperatures, which allow you to use less water and pressure to get better results. All of our saturated steam systems can be combined with a hot water pressure washer for maximum versatility.

## Steam Generators and Water Heaters

High horsepower steam generators allow you to create large volumes of steam at low pressure for culvert steaming, railcar cleaning and degassing and concrete curing. Adding heated water to your process allows you to maintain consistent results and maximize efficient operations.

## Pressure Washers by HydroTek

Full line dealer for HydroTek pressure washers By Nilfisk. Models include HN, HP, HD, SM and SS Series —rugged systems of the best quality with excellent pricing and service.

# SteamKing PRO Plus+

## Technical Specs

175 C (339 F) Temperature, 6 Bar/90 PSI

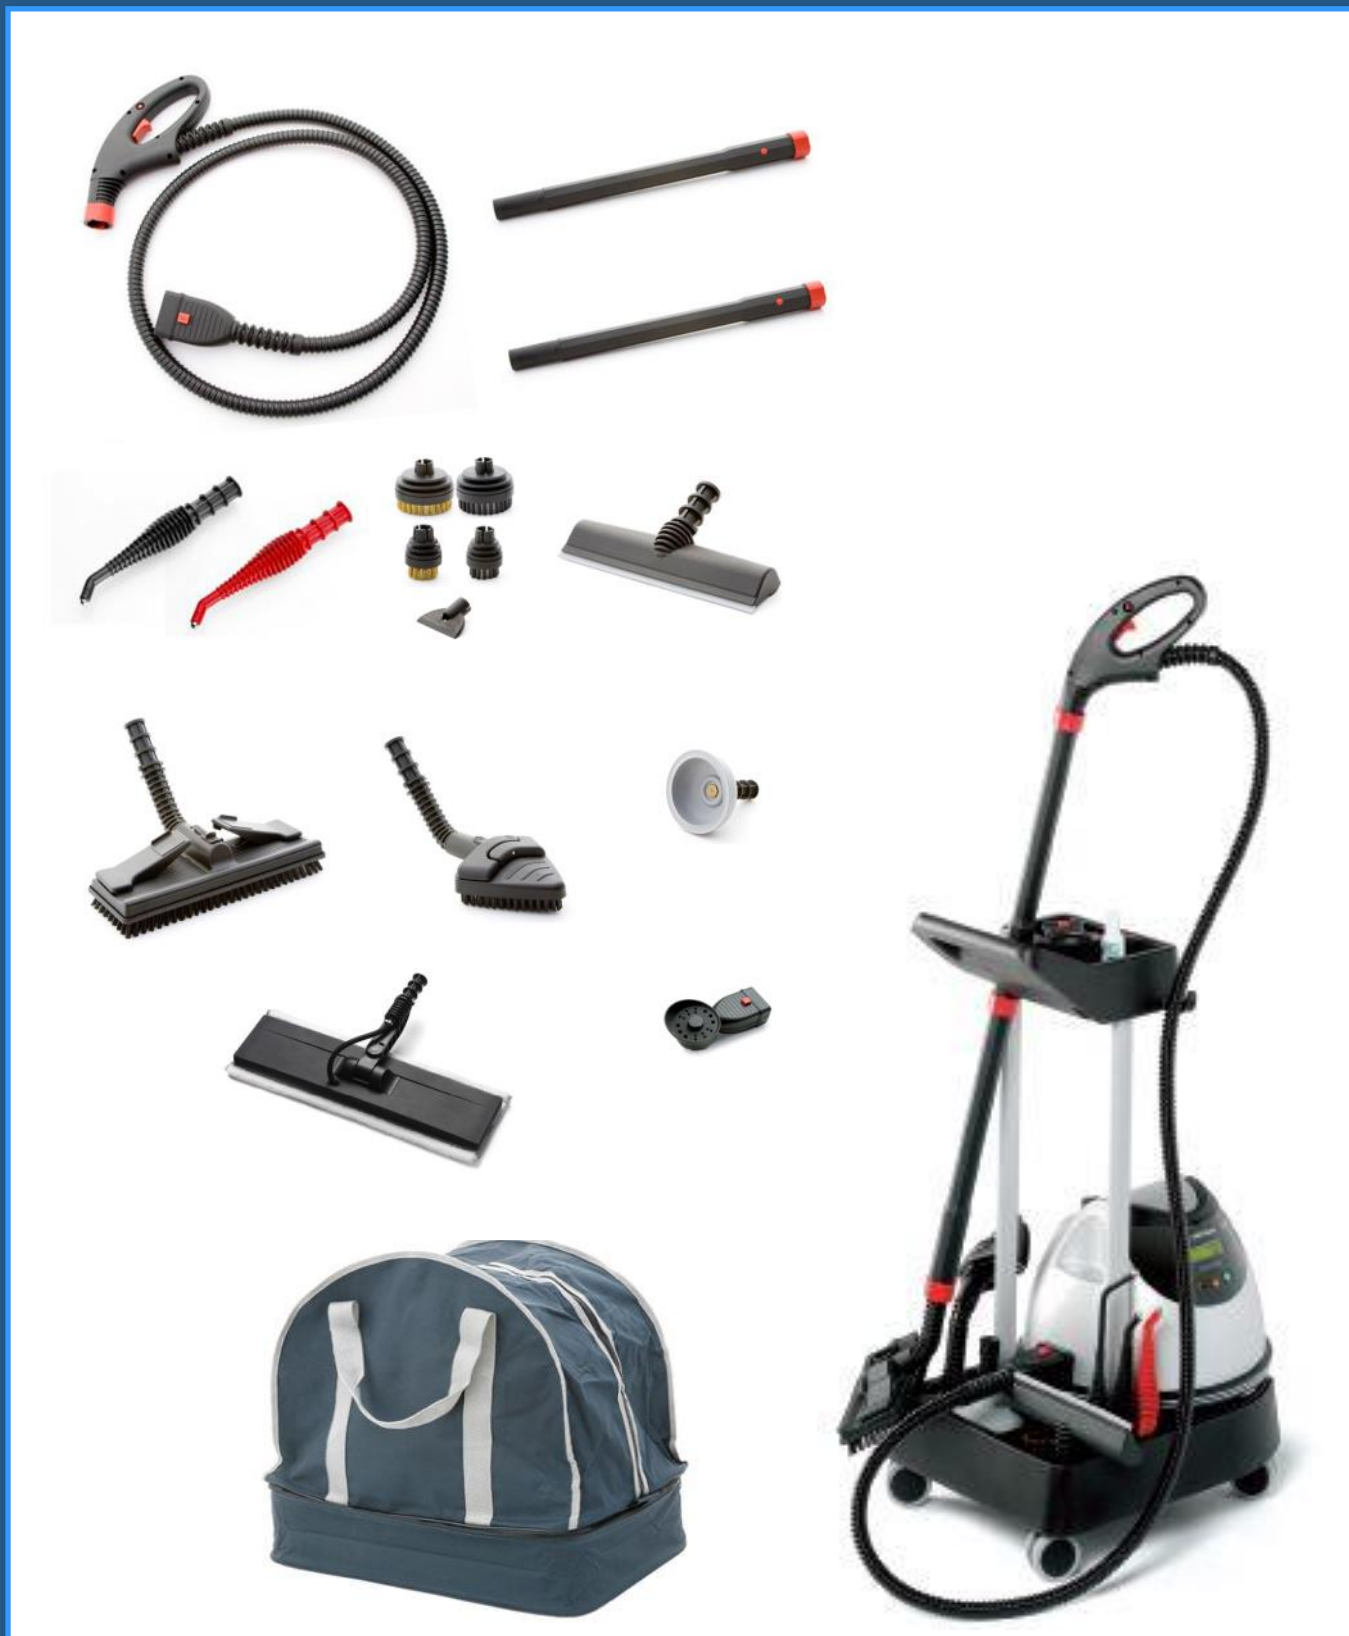

1.5L Boiler, 2.5L Water Reservoir

1800 watt heating element, 120V 1ph 60 Hz

7 Minute Heating Time

System	Includes
SK902+	SteamKing PRO Plus+ Steam Cleaning System. This model features a user friendly and modern digital display, complete accessory package and choice of carrying bag or cleaning cart. Accessory package includes extension tubes, hose assembly, rectangle and triangle brushes with towel clips, window/metal squeegee, detail nozzles (colour coded for multiple uses), nozzle brushes, scraper tool, drain tool, filter and mop accessory. This unit comes standard with the Plus+ Water Treatment and Infection Control Module for PIDAC Recommended levels of cleaning and infection control.
SK5000	Cart for SteamKing Pro Plus+ Steam Cleaning System. Store all accessories for your system in a professional and convenient tool storage cart. (Choice of Cart or Bag included with all Pro Plus+ Systems.)
SK5001	Carrying Bag for SteamKing Pro Plus+ Steam Cleaning System and Accessories. (Choice of Cart or Bag included with all Pro Plus+ Systems.)

# SteamKing Pro Plus+ Accessories and Options

# SteamKing MAX Plus+

## Technical Specs

175 C (339 F) Temperature, 6 Bar/90 PSI

120V 1ph 60 Hz

5-7 Minute Heating Time

# SteamKing Classic Plus+ System

Code	Description
SK1500	SteamKing Classic Plus+ Digital Steam Cleaning System with Complete Accessory Package and Choice of White Utility Cart, Janitorial Style Cart or SaddleBag Carrier. Complete Accessory Package includes 3M Hose, 2 Extension Tubes, Rectangle Brush with Towel Clips, Triangle Brush with Towel Clips, Window Squeegee with 2 Blades, Steam Lance Nozzle, Turbo Nozzle, Standard Nozzle, Gray Nozzle, 6 Nozzle Brushes, Drain Wrench, Funnel and Guides and Manuals. Featuring the Plus+ Water Treatment and Infection control System.
A5009	Saddlebag Carrier (SteamKing Classic Plus+ includes choice of White Utility Cart, Janitorial Style Cart or SaddleBag Carrier)
A5000	White Utility Cart with Basket (SteamKing Classic Plus+ includes choice of White Utility Cart, Janitorial Style Cart or SaddleBag Carrier)
A500T	Gray Janitorial Cart (SteamKing Classic Plus+ includes choice of White Utility Cart, Janitorial Style Cart or SaddleBag Carrier)
A8000092.0	Steam Mop—for use with any existing SteamKing 1500 or Classic System.

# Plus+ Water Treatment and Infection control System

## -excerpt from PIDAC Best Practices Document

### **Steam Vapour**

Steam has been used effectively to sterilize medical equipment but has not been used for disinfection of environmental surfaces due to the size and immobility of equipment used to deliver the steam. Recent advancements in technology have dramatically decreased the size of steam generators, making them portable and practical.

Saturated steam is composed almost entirely of water in the vapour phase and is hotter and drier than typical steam vapour, which is often laden with small droplets of liquid water. Because saturated steam is drier than typical steam, it poses no more risk to electronics and other devices than normal liquid disinfectants. Care should be used around thin plastic films to prevent distortion from the heat of the steam vapour.

Portable steam generators may be used to clean kitchens, bathrooms, floors, walls and other surfaces using steam delivered with a nozzle brush. Steam vapour is applied using a back and forth motion for five to ten seconds. Grease, oil, stains and dirt are easily and effectively extracted and bacteria and viruses are killed. Steam vapour effectively travels through biofilm to kill microorganisms that may be unreachable by the surface application of disinfectants. Portable steam cleaners have demonstrated bactericidal, virucidal, fungicidal and sporicidal activity against *C. difficile* spores in experimental situations.<sup>181, 182</sup> Further study in clinical situations is needed.

Steam vapour disinfection is rapid, cost-effective, safe for the environment and leaves no residue. While its use in health care settings has not been well studied, it may offer a viable alternative for the future.

The advantages and disadvantages of steam vapour disinfection are presented in **BOX 12**.

#### **BOX 12: Advantages and Disadvantages of Steam Vapour Disinfection**

##### **Advantages:**

- rapid (five to 10 seconds of exposure)
- inexpensive
- extracts grease, oil, stains and dirt as well as effectively killing microorganisms
- no residue left following disinfection
- no need to remove patients/residents from the room during cleaning
- can be used on electronic equipment and most fabrics
- steam generators are portable

##### **Disadvantages:**

- may distort or melt some types of plastics and vinyls

181. Tanner BD. Reduction in infection risk through treatment of microbially contaminated surfaces with a novel, portable, saturated steam vapor disinfection system. *Am J Infect Control*. 2009 Feb;37(1):20-7.
182. Sexton JD, Tanner BD, Maxwell SL, Gerba CP. Reduction in the microbial load on high-touch surfaces in hospital rooms by treatment with a portable saturated steam vapor disinfection system. *Am J Infect Control*. 2011 Oct;39(8):655-62.

# Blue Evolution Plus+—with Plus+ Water Treatment and Infection Control, Vacuum and UV-C

## Technical Specs

175 C (339 F) Temperature

1.8L Boiler

6 Bar/90 PSI

2L Water Reservoir and 2L Solution/Water Reservoir

1800 watt heating element

120V 1ph 60 Hz or 220V 1ph 50HZ

UV-C System for Waste Water Treatment

5 Minute Heating Time

System	Includes
BES110	Blue Evolution Steam Cleaning System with Water Filtered Vacuum and UV-C Sanitizing—Operating at 6 Bar on 110V Electrical, this Complete System features steam and vacuum accessories for every cleaning task. The only system in North America with UV-C filtration, ensures all dirt collected in the vacuum reservoir is sanitized for a health environment. The overall cleaning power of this machine is incredible and the vacuum option makes for a complete, easy and fast total clean! The biggest innovation in Steam Cleaning in over a decade with upgrades to casters, hose and accessory fittings and featuring digital display!
